

## REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

125718-1000

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed in patent number 6,005,306, granted Dec. 21, 1999, and for which a reissue patent is sought on the invention entitled \_\_\_\_\_

Remote Control Door Lock System

the specification of which

☒ is attached hereto.

☐ was filed on \_\_\_\_\_ as reissue application number \_\_\_\_\_ / \_\_\_\_\_  
and was amended on \_\_\_\_\_  
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The patentee believes that he claimed less than he had the right to claim. This reissue is a broadening reissue. The nature of the broadening and the errors upon which the reissue is based is indicated in the claims included in a Preliminary Amendment attached to this Declaration. At least one error occurred by the patentee failing to claim a wireless remote control lock system including the combination of elements set forth in Claims 20 and 32 in the Preliminary Amendment wherein the control unit is operable to move the striker plate member to its first position for a predetermined period of time, or the control unit is responsive to first and second signals from a transmitter, in the manner recited in the claims.
